AYUSH GUPTA

Mumbai, Maharashtra
+91-7738184875 guptaayushrajeshwar@gmail.com Ayush Gupta AyushGupta45

OBJECTIVE

Final-year AI & Data Science student with hands-on experience in full-stack development, agentic AI systems, and workflow automation. Built production-grade projects using Next.js, TypeScript, and LLM integration with real-world impact.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL
Frameworks & Libraries: Next.js, React.js, Node.js, Express.js, tRPC, Tailwind CSS, ShadCN UI, React Flow, Recharts
Database & ORM: PostgreSQL, MongoDB, Drizzle ORM
AI & Automation: LLM Integration, Agentic Workflows, Multi-Agent Systems, Groq API, Puppeteer, Cheerio
Tools: Git & GitHub, REST APIs, Postman, Vercel, VS Code

PROFESSIONAL EXPERIENCE

Backend Developer
Freelance | Jan 2024 – Mar 2024

- Developed RESTful API routes for worker management, shift scheduling, and site allocation for a Canada-based construction company using Node.js and MongoDB.
- Designed MongoDB schema with models and relations for workers, shifts, and construction sites, enabling structured data access and end-to-end shift tracking.

Full Stack Developer – Ayushman Hospitals
Freelance | Jun 2024

- Built a production hospital website using TinaCMS with a zero-cost architecture – content edits commit directly to GitHub, eliminating database hosting costs entirely.
- Delivered a Git-backed CMS-driven static site enabling non-technical staff to manage content without developer intervention; live at ayushmanhospitals.com.

PROJECTS

ScrapeFlow – Next.js, TypeScript, React Flow, Puppeteer, Cheerio, tRPC, Drizzle ORM, PostgreSQL

- Built a visual DAG-based web scraping orchestration platform using Next.js and React Flow, enabling no-code pipeline creation for automated data extraction workflows.
- Implemented dual-engine scraping with Puppeteer (JS-rendered dynamic sites) and Cheerio (static HTML), with stealth plugin for anti-bot bypass across 30+ modular task nodes.
- Extended with custom analytics nodes: sentiment analysis, Chart.js data visualization, jsPDF report generation, conditional branching, and AI-powered extraction via LLM.

TradeSafe – Next.js, TypeScript, Agentic AI, Groq API, Drizzle ORM, PostgreSQL

- Built an agentic AI crypto arbitrage detection platform monitoring 5 exchanges (Binance, Kraken, KuCoin, Bybit, Gate.io) via parallel REST API polling with fault-tolerant adapters.
- Engineered a multi-agent debate system (Bull, Bear, Mediator) using Llama 3.3 70B via Groq, validated through a 7-step agentic pipeline.
- Delivered 4 modules: real-time agentic execution, portfolio-tracked trade simulation, demo arbitrage showcase, and historical backtest analysis with charted insights.

EDUCATION

Bachelor of Engineering in Artificial Intelligence and Data Science — **2023 – 2026**
University of Mumbai — **GPA: 8.4**

Diploma in Computer Engineering — **2021 – 2023**
Maharashtra State Board of Technical Education (MSBTE) — **Percentage: 83.6%**

CERTIFICATIONS

- **Artificial Intelligence & Machine Learning** – Training + Internship — **Jul – Aug 2022**
- **Full Stack Web Development** – Apna College — **Dec 2023**
- **AWS Cloud Foundations** – AWS Academy — **Feb 2025**
